We often get asked if a Mac can do everything a traditional laptop does. This often stems from a senior manager or director who has seen somebody else with one and wants one! After all, they are manufactured to the highest standards and beautifully designed, so in your tech journey a preference for Macs speaks volumes about your appreciation for design and functionality. But whilst admiring them, you might question whether a Mac can truly hold its own against your trusty PC laptop. Let's explore this topic further and uncover the myriad capabilities that Macs can bring to the table.
